

Ballpark Pricing

Last updated October 2026

Below are typical services and fees at Reach Fertility. These fees are estimates and budgets only. They are a guideline for your reference, not a quote and not a formal estimate. They do not reflect services that may be covered by your health insurance, and pricing may change without notice. Outside services listed below are paid directly to those providers; please contact them for exact pricing.

Initial Consult: \$250 for self-pay patients, due at scheduling

At your first appointment, you'll meet with one of our fertility specialists to review your medical history and past records (if applicable). Together, you'll discuss your fertility goals, review potential findings and map out next steps for your care.

- Includes an Anti-Müllerian Hormone (AMH) test and a pelvic ultrasound. These may be completed at your initial consult or scheduled for the beginning of your next cycle.

Fertility Assessment: \$2,400, due before your New Patient Clinic Appointment

The Fertility Assessment Bundle provides a thorough evaluation of your reproductive health. It includes:

- In-house lab work for fertility-related factors (some tests may be sent to third-party labs at additional cost)
- Ultrasound(s) to examine your reproductive organs and check for structural issues
- Hysterosalpingogram (HSG) to assess your fallopian tubes and uterine cavity
- A follow-up consultation with your specialist to review results and develop a personalized treatment plan

Treatment Packages

All packages include cycle management and monitoring (bloodwork and ultrasounds). Post-treatment care and anesthesia fees are not included. Once your treatment plan is set, your patient experience manager will give you a formal estimate.

Treatment	Estimated price
Intrauterine Insemination (IUI)	\$1,500
Fertility Preservation	\$4,000
Frozen Embryo Transfer (FET)	\$4,500
Donor Embryo Recipient Matching Fee	\$6,000
FET with Gestational Carrier	\$8,300
In Vitro Fertilization (IVF)	\$15,000
Reciprocal IVF	\$17,000

Post-Treatment Care: \$1,200

The Post-Treatment Care Bundle includes follow-up assessments to monitor your progress: in-house blood work to measure key hormone levels, including hCG to confirm pregnancy; an ultrasound to assess early pregnancy development (if applicable); and a consult to discuss results and next steps (if applicable).

Per-Service Fees

Service	Price
Consults	\$170 – \$350
In-house bloodwork (E2, P4, LH, FSH, hCG, TSH)	\$90 per test
Ultrasound	\$250
Hysterosalpingogram (HSG)	\$1,050
Saline Sonogram (SIS)	\$830
Trial Transfer	\$600
Storage (egg, embryo or sperm)	\$79 per month, per specimen type
Semen Analysis	\$200
Cryopreservation of Sperm	\$500
Sperm Thaw	\$60
TESE (testicular sperm extraction)	\$4,175
Cryopreservation of Egg/Embryo	\$600
Facility Fees (Reach Operating Room)	\$450 – \$675
Platelet Rich Plasma	\$1,050

Preimplantation Genetic Testing (PGT)

PGT evaluates embryos before transfer for genetic conditions or chromosomal abnormalities, or to determine the sex of an embryo for family planning. It is billed in two stages.

Stage 1: Biopsy and case preparation (included in your treatment estimate)

- PGT biopsy fee: \$1,975
- PGT-M case preparation fee: \$1,565

Stage 2: Per-embryo analysis (billed by Embryology after retrieval)

- PGT-A: \$265 per embryo
- PGT-M: \$390 per embryo (includes PGT-A)
- PGT-SR: \$365 per embryo (includes PGT-A)

Medication

Most treatments require medications from a specialty pharmacy, chosen by your insurance or recommended by your nurse. Reach cannot estimate medication costs, because they are set by your pharmacy and vary widely by treatment.

Clinic Affiliates

You may also receive a bill from one of the outside groups we work with. These services are not included in our bundle pricing, and you will be billed directly by that group. For questions about expected cost, please contact the biller directly: Labcorp, Natera, Igenomix, Reprosourse, Providence Anesthesia and CooperGenomics.
